Daddy

hello 7:35 pm

Hello! I'm so glad to hear from you today. As your daily ACL rehab coach, let's go through your check-in.

[USER CONTEXT]
Surgery Date: 2026-01-15
Days Post-Op: 82
Weeks Post-Op: 11
Current Phase: Phase 3 (Progressive Loading)
Surgery Type: ACL Reconstruction

First, could you please provide me with your current pain level (0-10 scale), swelling status (worse/same/better), range of motion for extension and flexion, and whether you were able to complete your prescribed exercises today?

Knowing your latest metrics is crucial so I can provide personalized recommendations aligned with your recovery phase. Once I have those details, I'll be happy to guide you through today's rehab plan. Looking forward to working with you! 7:35 pm

Surgery date 2026-03-23
Pain level 3
Swelling status better
Extension 0
Flexion 75
I completed my prescribed exercises today
7:38 pm

Great, your surgery was on March 23rd, 2026 - you're now 2 weeks post-op. Let's log

Great, your surgery was on March 23rd, 2026 - you're now 2 weeks post-op. Let's log your daily metrics:

7:38 pm

What exercises do you recommend

7:38 pm

Great, I've logged your latest metrics. Based on your 2 weeks post-op status and being in Phase 2 (Early Strengthening), here are some recommended exercises:

Strengthening:

- Seated leg raises (3 sets of 10-15 reps)
- Isometric quads contractions (hold for 5-10 seconds, 3 sets)
- Calf raises (2 sets of 10-15 reps)

Range of Motion:

- Stationary bike (low resistance, 10-15 mins)
- Seated knee flexion/extension (3 sets of 10-15 reps)
- Wall slides (3 sets of 10-15 reps)

Remember to take breaks as needed and focus on proper form. If you experience any sharp pain or increased swelling, stop the exercise and contact your PT or surgeon.

Keep up the great work! Let me know if you have any other questions. 💪

7:07 pm

what is my pain level 7:15 pm

According to your latest check-in, your reported pain level is 3 out of 10. This is a good sign, as it indicates your pain is well-managed during this stage of your recovery.

Let me know if you have any other questions!

7:15 pm

what was the pain level yesterday 7:16 pm

Unfortunately, I don't have any information about your pain level from yesterday. The data I have is only for your latest check-in on 2026-04-09, where your reported pain level was 3/10.

Since I don't have access to your historical check-in data, I can only provide recommendations based on the most recent information you've provided. If you'd like me to track your pain levels over time, you'll need to make sure to log your daily metrics each time we connect.

Going forward, please be sure to provide your full daily check-in details, including any changes from the previous day. That will allow me to better monitor your progress and provide personalized guidance throughout your recovery. Let me know if you have any other questions!
